When I opened it, the game was closed. 18 Sept 2015 I tried getting it to work with the updates, but the game wouldn't load. I don't know if this is because I got the game on my phone's SD card instead of my PC, or if it's because the game didn't update correctly. Anyway, I ended up finding a patch online that would let me get the game to load. Since then, I've been able to play with no issues, although there are still a few glitches in it. I haven't been able to get the console functionality to work, but that could just be me.
