3D Numeric Clock

3D Clock uses up-to-date numeric clock screensaver. This is just another mathematical image screensaver. As the name suggests, it takes the latest, fully accurate time clock and presents it in a 3-dimensional way. It also has a great animation of a falling spiky ring. After every "tick", the new values are being shown. If you're not familiar with 3-dimensional math, you probably won't understand how it really works, but it's definitely a lot of fun. You can switch the clock between 24 hours and 12 hours mode. 3D Clock uses a simple UI with option settings. With the help of graphic tools you can setup all the items for your needs. Just be sure to have a cup of coffee or a glass of tea so your eyes won't go bad. 4 major functions are available: • Animated clock • Set the time, the date or the day of the week • Adjusting time zone • Split the clock into two (24 hours and 12 hours mode) • Turn on/off the animation of the ring of time • Change the clock background 3D Clock is a real mathematical and 3-dimensional object. No, it isn't a game, it is a screensaver. But it is a real 3-dimensional, mathematical-based item. 3D Clock supports various languages like English, Spanish, French and Italian. You can display the time in Arabic, Chinese or Vietnamese too. And no, you don't have to have any 3-dimensional software installed to use 3D Clock. 3D Clock is completely free and doesn't have any spyware. It works fast and has low CPU consumption. The clock is shown in 24 hours and 12 hours modes. The interesting thing is you don't need a dedicated 3-dimensional space to use the clock. You can use it on a regular screen, or even on other surfaces. *... SKYCLOCK is a software that will display the sun, moon and planets at the right angle for optimal viewing. Using SKYCLOCK you can view the planets in our solar system and learn more about them. Features: *...With the American Civil War behind us and the United States having come into its own in the decades since, the discussion among historians and military enthusiasts about the effectiveness of the Army's new tactic of skirmishers appears to be over. Skirmishers have been around for centuries, whether as light infantry scouts or mercenary army patrols, if not always alongside infantry. In the American Civil War, the Army's new Chief of the Artillery at the time (the position replaced Major General Benjamin Franklin Butler after he volunteered for Lincoln's side) was General Henry Wager Halleck, who oversaw the development of skirmishers. The Army adopted the new weapon in 1859. By the

time the Civil War broke out in 1861, skirmishers - sometimes referred to as sharpshooters - were considered a necessary tool. They not only provided the Army with an efficient way to conduct warfare (instead of losing whole battalions of unarmored infantrymen to enemy sharpshooters, skirmishers could be placed close to the enemy to quickly outnumber the enemy, striking and then retreating before the enemy could react), but they were also believed to be integral to the new Union strategy. The Union Army had adopted a strategy of "offensive campaigning," in which an army would quickly surround an enemy position and strike with overwhelming numbers. These actions, known as "Cavalry and Sharpshooters," could then be easily executed by "skirmishers on forage." The tactic, using especially fast, highly mobile fighters, was designed to use the Army's overwhelming power to swiftly defeat the enemy, whose forces could not be equally as mobilized quickly. There were six divisions of skirmishers established at the outbreak of the Civil War. Each division was commanded by a colonel, and consisted of one battalion of light artillery infantry (mounted artillery light infantry with a small number of bayonets), two battalions of mounted skirmishers, and three battalions of dismounted skirmishers. At the beginning of the war there were also 2 companies of sharpshooters assigned to the Army. These sharpshooters were used to protect Union Army supplies and camps, conduct reconnaissance, and defend against Confederate soldiers attempting to infiltrate Union-controlled areas, but they were rarely utilized offensively
