For more AutoCAD articles, go to the AutoCAD tag page. AutoCAD is used by architects, contractors, engineers, and other professionals to create 2D and 3D drawings, diagrams, and images that represent the design and specification of objects, buildings, landscapes, and machinery. AutoCAD is used in design and documentation phases of most mechanical, electrical, architectural, and civil engineering projects. History The first version of AutoCAD was released on Dec. 1, 1982, as an MS-DOS application. The original AutoCAD generated graphics images with the video BIOS of its host system, a microcomputer (e.g., an 8086, 8088, or Motorola 68000) with an internal graphics adapter card (or "Video BIOS ROM"). The first version of AutoCAD was for use with an IBM Personal Computer (PC) compatible, such as an IBM PC with an 80286 or 80386 processor and a graphics adapter. After AutoCAD's 1982 release, the software evolved into a DOS, Win16, or Win32 application, running in the DOS window of a graphic PC. Because the first version of AutoCAD was a stand-alone application, users could draw and edit their drawings in a separate window. AutoCAD was released as a MS-DOS application. This allowed it to run under DOS, Windows, and Windows 95. AutoCAD 2013 is built in a new direction that allows it to be installed on Windows, OS X, and Linux. When it first appeared, users could operate AutoCAD in DOS and Windows in three different ways: A single application, where AutoCAD's GUI (Graphical User Interface) overlapped the DOS (if you were running the application in a window) or Windows (if the application was not in a window) window. The GUI components were essentially an extension of the host operating system. Windows and DOS (or Windows) made available a number of 3D and 2D drawing commands. A second application where AutoCAD's GUI overlapped the DOS or Windows window. In this mode, the only drawing commands available were those that the host operating system made available. Third, AutoCAD's GUI ran within the DOS or Windows environment. In this mode, AutoCAD could not run in DOS mode. It was configured to run in Windows mode, so you could use commands not available in DOS. AutoCAD could also

This study examined the effect of endothelin-1 (ET-1) and thromboxane A2 (TXA2) blockade on the increase in pulmonary vascular resistance (PVR) during acute pulmonary hypertension (PH). In anaesthetized open-chest mice, ET-1 (2.8 nmol/kg), a TXA2 mimetic, U-46619 (1.6 micrograms/kg) and the combination of both treatments were given i.v. and pulmonary pressures, left ventricular dP/dt and heart rate were continuously monitored. Pre-treatment with the ET-1 antagonist, BQ-123 (5.6 nmol/kg) or the TXA2 antagonist, PD-123119 (10.4 nmol/kg) prevented the increase in PVR induced by U-46619 (P Ronnie James Dio 20-Jun-1966 - 30-Apr-2010 American singer-songwriter Ronnie James Dio was born on June 20, 1966, in Phoenix, Arizona, the son of a hairdresser, mother and a father who was a professional poker player and Dio's earliest musical influence. India Updated: Sep 23, 2019 00:02 IST Defence Minister Rajnath Singh said on Saturday that the government would seek the cooperation of India's global partners in globalising India's armed forces. Speaking at the Security Dialogue at the Eastern Economic Forum, the minister said the armed forces would provide the necessary momentum to make India the world's fifth largest economy. "The globalisation of our armed forces is one of the biggest goals we have set for ourselves," said Singh. In his opening remarks, which he delivered in Hindi, the minister said that in his two-day visit to Japan and China in the first week of October, he would deliberate on the security situation in the Indian Ocean and East Asia. "My visit to Japan and China will focus on security cooperation and dialogue," he said, adding that he would also strengthen the defence ties with both the countries. The minister said he will also visit Singapore, Malaysia, Australia and New Zealand, where he will hold talks with these countries on our bilateral ties, regional cooperation and defence ties. Singh noted that India's economic growth had surpassed that of China and Japan, two of the world's largest economies. He also pointed out
