### What's New In ConceptDraw DIAGRAM?

ConceptDraw DIAGRAM is a powerful application that enables business users, team leaders, and project/product managers to create, edit, illustrate or draw business implementation processes, graphic structures, business or product documentation, flowcharts, and others. The overall business suite for extensive use ConceptDraw DIAGRAM is part of the wider office solution suite called ConceptDraw. This specific resource, ConceptDraw DIAGRAM, as presented by its suggestive name offers you the possibility to create diagrams, flowcharts, and all sorts of process illustrations. Installing ConceptDraw DIAGRAM is done through a single-suite installer. As such, you get the other applications in the package installed as well. However, you can buy the programs individually, and you don't need to purchase them all at once. Also, the current application communicates with ConceptDraw STORE. When browsing the list of available packages, templates, and objects in ConceptDraw DIAGRAM, you will be able to download entire libraries of assets (e.g., for business process illustration, logistics flow charts, IDEF business process diagrams, cross-functional flowcharts, etc.). In order to download free resources and libraries that you can use in DIAGRAM, you need ConceptDraw STORE to browse through, download, and install the contents of the packages listed in the ConceptDraw online store. In the same location, you will find more extensive resources that you can buy separately, as well as free assets. The advantages of using this diagramming and illustration application This app, compared to others alike, brings some extra benefits to its users. Besides a crazy amount of free or paid templates and assets, you can format, align, and arrange elements in your diagrams individually, in many ways. Also, ConceptDraw DIAGRAM is compatible with MS Visio (Drawings and Stencils) and supports different-format imports, including graphic files, or MS PowerPoint, PDF, and SVG manipulations. You can export your work to SWF (Adobe Flash), PDF, EPS, HTML, SVG, PPTX, or as a graphic file. Furthermore, the application includes a crazy amount of drawing tools, flowchart creation features (e.g., chain and tree connection modes, auto-routing capabilities for smart connectors, accelerated design methods, etc.), presentation creation options, and design-oriented planning models.
